

Letter of recommendation

Las Palmas, 28 de octubre de 2024

To Whom It May Concern,

I am pleased to recommend Luca Bison for a position in the gaming industry. During his internship with our company, Rising Pixel, Luca played a key role in the development of an immersive HTML5 3D microverse experience focused on mental health and mindfulness.

Luca demonstrated exceptional technical abilities, leveraging a robust stack of technologies including ThreeJS for 3D graphics, React and React Three Fiber for building the user interface, and Vite as the module bundler.

Beyond his technical expertise, Luca exhibited exceptional adaptability and a proactive approach to problem-solving. He quickly acclimated to our workflows, collaborating effectively with both experienced team members and new interns. Luca's dedication and willingness to take on challenges allowed him to contribute significantly to the project's progress, and we witnessed substantial growth in his technical and collaborative abilities during the internship.

Some of Luca's key strengths that I believe would make him an excellent candidate for roles in the HTML5 gaming industry include:

- Proficiency with cutting-edge web technologies and frameworks
- Strong understanding of game design principles and interactive user experiences
- Ability to work independently and collaborate effectively in a team environment
- Eagerness to learn and apply new skills, staying up-to-date with industry trends
- Commitment to delivering high-quality work and contributing to project success

I am confident that Luca's technical skills, creativity, and collaborative nature would make him a valuable asset to any team working on innovative HTML5 gaming experiences. I recommend him without reservation and believe he has a bright future ahead in this dynamic industry.

Please feel free to contact me if you require any additional information.

Sincerely,
Luca Contato
CEO, Rising Pixel
